

A heartfelt thanks to a special company, Top Notch

By Bobbie Hemmerich | Jul 20, 2012

I'm rapidly approaching my 70th birthday and extreme heat takes its toll even with air conditioning.

However, in the early hours of the morning on July 4 I woke up to the loss of half my electrical power which included my A/C unit, all my appliances and many of my centrally located outlets. I knew it wasn't caused by the utility company and tried flipping all the breakers with no luck and here it was a major holiday!

I then started making phone call for assistance with no success and, in total desperation with the temperature in my home above 90 degrees, I called my heating and cooling company, Top Notch in Lewes.

Within half an hour two servicemen arrived and found that one of the main wires leading into my home was bad. Their boss arrived shortly thereafter, took one look at me and my dog, and vowed not to leave until we had service. He was true to his word and within another half hour service was restored.

My deep gratitude to Bob, Dana and Top Notch for their care and concern and for going above and beyond the call of duty. I highly recommend this company!
